

I have integrated the new user types, regional hosting needs, and scalability targets into the PRD structure. Here is the updated version ready for your documentation.

Stellify – Product Requirements Document (Part 1)

Overview

- **Application Name:** Stellify
- **Organization:** Jesus the Most Precious Name Church (Press Church)
- **Platform:** Web application (Accessible via modern browsers on mobile, tablet, and desktop)
- **Infrastructure & Hosting:** Built and hosted on Replit. The server/data center must be located within the **Asia region** to ensure low latency and quicker access for the current member base.
- **Scalability Target:** Initially designed for 100 to 1,000 members, with architecture that supports future growth and guarantees smooth, reliable daily usage for habit logging.
- **Target Launch Date:** June 28, 2026
- **Core Purpose:** To monitor church members, provide a platform for members to log personal and spiritual habits, and grant visibility to church leadership.

User Roles & Access Levels

- **Super User:** Admin / Church IT (Handles member registration and account statuses)
- **Leadership/Visibility Roles:** Pastor, Caregroup Servants, Sharing Huddle Captains, Caregroup Auditor, Church Auditor (Treasury/Finances)
- **Account Types:**
 - **Official Member (Production):** Real church members actively using the live system.
 - **Test Member (UAT):** Dummy accounts utilized exclusively for User Acceptance Testing and system checks without skewing live production data.

Database & User ID System

- **Legacy Data Migration:** Initial bulk update of 52 members from the existing spreadsheet, PMDB (Precious Members Database).
- **User ID Formats:**
 - **PCM (Precious Church Member):** Used for Official Members. Format is **PCM** followed by a 4-digit code (e.g., **PCM0001** for the Admin, **PCM0053** for the first new system-generated member).
 - **TCM (Test Church Member):** Used for Test Members. Format is **TCM** followed by a 4-digit code (e.g., **TCM0001**).
- **ID Retention Rule:** ID numbers are unique and permanent. If an account is deactivated or excommunicated, the ID is archived for record-keeping and is never reassigned to a new user.

UI Flow: Member Registration Form

This form is accessible and managed by the Admin/Church IT. It is divided into four distinct sections.

Section 1: Account Details

- **User ID:** PCM or TCM Number
 - **Authentication:** Password (includes reset capability)
 - **Profile Picture Upload:**
 - **Discipleship Control Toggle:** An account configuration setting handled by the Admin:
 - **Discipleship Enabled:** The deadline countdown updates and runs continuously.
 - **Discipleship Disabled:** Used for babies or biological children who are not yet tracking personal milestones; the countdown card is hidden from view.
- SBG End Date:** Date basis of the counter
- **Account Status Rules:**

Status	Definition
Active	Approved by the Pastor.
Deactivated	Account is currently under review.
Retired	Member has been excommunicated. Data is archived to clear system space but retained for records.
Deleted	Account is purged from the system. Requires data extraction prior to deletion.

Section 2: Church Member Details

- **Name:** First Name, Middle Name, Last Name
- **Demographics:** Gender, Birthday, Civil Status, Wedding Anniversary (if married)
- **Contact Info:** Email, Contact Number
- **Health & Safety:** Food Preferences, Medical Condition, Medication
- **Emergency Contact:** Name, Relationship, Contact Number
- **Social Media Profiles:** Dropdown of platforms and profile links. This enables "Brethren Watch," allowing members to ensure each other are living digitally in accordance with God's desires.

Section 3: Church Groupings

This section drives the notification and accountability system for the habit tracker.

- **Family Grouping:** Primary Group Number and Family Role (Family Member or Family Leader). Family members receive alerts regarding habit completion.
- **Care Group (CG):** CG Number and CG Role (CG Member or CG Servant). CG Servants receive alerts to follow up with members regarding spiritual habits.
- **Sharing Huddle:** Sharing Huddle Number and Sharing Huddle Role (Sharing Huddle Member or Sharing Huddle Captain). Used for sharing evangelism strategies and attempts.

Section 4: Church Member Milestones

- **Important Dates:** Salvation Date, Baptism Date, Sharing Permission Date, Bearing Date, Dedication Date.
- **Ministry Roles:** Options include Worship Service (Song Leader, Instrumentalist, Dancer), Teacher (Children's Teacher), Kitchen (Helper, Cook), Pastor, Servant, or Sharing Captain.
- **Sharing Attempt:** this is captured via a different section but is visible to the user when viewing under Member profile tab
- **Bearing Result:** this is captured via a different section but is visible to the user when viewing under Member profile tab
- **Stellar Status Tracking:** Status progression relies on evidence gathered from the app's spiritual and personal habit tracker.

Star Level	Status Code	Meaning	Requirements & Progression Rules
1-Star	SBG	Saved By Grace	Default starting status. Members have a maximum of 3 years to progress; failure to do so results in excommunication.
2-Star	P2S	Permitted To Share	Achieved after the member proves spiritual/personal growth via the habit tracker and applies for the upgrade.
3-Star	S2B	Sharing To Bear	Achieved when a member attempts to share and logs a successful "bearing result" (bear 1).

4-Star	P2G	Pleasing To God	Achieved when a member reaches more than 30 bearing results.
---------------	------------	-----------------	--

UI Flow: Member Self-Service & Profile Updates

While the initial registration form is strictly for Admin and Church IT use, members will have access to a **My Profile** portal to keep their information accurate.

Profile Picture Requirement

- **All Users:** Both Admin (during registration) and Members (during self-updates) must have the option to upload, update, or remove a **Profile Picture**.
- **Storage:** Handled securely within the system to display next to the member's name on leadership dashboards and habit tracking feeds.

Field-Level Access Control (Permissions Matrix)

To prevent unauthorized changes to church leadership structures and milestones, access to fields within the profile is strictly split into **Read/Write** (editable by the member) and **Read-Only** (viewable by the member, but only editable by Admin).

PRD Section	Field Name	Member Access	Admin/IT Access
Account Details	Profile Picture	Read / Write	Read / Write
	Password Change / Reset	Read / Write	Read / Write
	Account Status (Active, Retired, etc.)	Read-Only	Read / Write

Member Details	First, Middle, & Last Name	Read / Write (<i>For fixing typos</i>)	Read / Write
	Demographics (Gender, Birthday, Civil Status)	Read / Write	Read / Write
	Contact Info (Email, Phone)	Read / Write	Read / Write
	Health & Safety (Food, Medical, Medication)	Read / Write	Read / Write
	Emergency Contact Details	Read / Write	Read / Write
	Social Media Dropdowns & Links	Read / Write	Read / Write
Church Groupings	Family Grouping & Family Role	Read-Only	Read / Write
	Care Group Number & CG Role	Read-Only	Read / Write

	Sharing Huddle Number & Huddle Role	Read-Only	Read / Write
Milestones & Status	Milestone Dates (Salvation, Baptism, etc.)	Read-Only	Read / Write
	Ministry Roles (Worship, Teacher, Cook, etc.)	Read-Only	Read / Write
	Stellar Status Level (SBG, P2S, STB, P2G)	Read-Only	Read / Write

UI/UX Rules for Member Portal

- **Visual Lock:** Fields designated as **Read-Only** for the member must appear greyed out or lock-iconed in the UI, with an inline note: *"To update this, please contact Church IT or your Care Group Servant."*
- **Validation:** Updating critical member details (like an email address or mobile number) should validate the format before saving to prevent broken communication channels.

Authentication Layer (Login Page)

Visual Elements

- **Branding:** Centered application name (**Stellify**) and the church logo.
- **Theme Adaptability:** Supports a light background or a dark background based on system settings or user preference toggle.

Form Fields & Validation

- **User ID String:** Accepts standard alphanumeric entry. The placeholder displays a default example value of **PCM0001**.
 - Accepts **PCM** (Precious Church Member) followed by four digits (e.g., **PCM0053**).
 - Accepts **TCM** (Test Church Member) followed by four digits (e.g., **TCM0012**).

- **Password:** Standard password masked input string.
- **Role-Based Routing:** Upon authentication, the system reads the database user profile to determine their UI level permissions. Roles include: *Admin, Super User, Pastor, Servant, Sharing Captain, Church Auditor, and Caregroup Level Auditor.*

Account Recovery & Security Controls

- **Self-Service Reset:** A "Forgot Password" link triggers an email containing a secure password reset link to the user's verified registration email address.
- **Admin/IT Controls:** Admins retain overriding permissions to manually reset user passwords, unlock accounts locked by failed logins, deactivate accounts, or change statuses.

2. Global Navigation Framework

Once authenticated, users land on a workspace featuring a **Left-Side Navigation Bar**.

Primary Hubs & Subtabs

- **Member Hub:** The default landing dashboard providing personal progress tracking.
- **Church Hub:** High-level overview metrics for group statistics.
- **Disciple Hub:** Direct tracking interface for mentorship and groups.
- **Ministry Hub:** Focuses on serving rotations and assignments (Worship, Teaching, Kitchen, etc.).
- **Stellar Board:** One-word name (**StellarBoard**) tracking spiritual status rankings across the collective church body.
- **Member Profile:** Self-service edit screen for updating personal demographics and emergency contacts.
- **Admin Panel:** Visible *only* to Admin or Church IT users. Features include registration forms, user unlock tools, account activation/deactivation, and manual overriding capability for stellar milestone statuses.
- **System Settings:** Preferences for toggle control between **Light Theme** (for morning/daytime use) and **Dark Theme** (for low-light/nighttime data entry).
- **Sign Out Button:** Terminates the browser user session securely.

3. Member Hub Architecture (Landing Page)

The Member Hub contains no deep subtabs. Instead, it serves as a unified dashboard composed of **four main UI cards/sections**:

Card 1: The Personal Greeting & Stellar Tracking UI

- **Profile Display:** Showcases the member's uploaded profile picture, full name, and distinct church ID number.
- **Dynamic Time-Based Greetings:** The text displays a time-appropriate greeting paired with a rotating spiritual or inspirational thought. Examples include:
 - 05:00 - 11:59: "Blessed morning, [Name]!"
 - 12:00 - 16:59: "Blessed afternoon, [Name]!"
 - 17:00 - 04:59: "Blessed evening, [Name]!"
- **Visual Star Level Metrics:** Evaluates and highlights standard progress levels using lit stars versus greyed-out stars.

None

★ [Level 1: SBG] | Saved By Grace | (Default status assigned on account creation)

★★ [Level 2: P2S] | Permitted To Share | (Earned via habit evidence; application required)

★★★ [Level 3: STB] | Sharing To Bear | (Earned via active sharing attempts and 1 "bearing result")

★★★★ [Level 4: P2G] | Pleasing To God | (Earned upon logging greater than 30 bearing results)

Card 2: The Timeline Milestone & Account Countdown Calendar

- **Discipleship Control Toggle:** An account configuration setting handled by the Admin:
 - **Discipleship Enabled:** The deadline countdown updates and runs continuously.
 - **Discipleship Disabled:** Used for babies or biological children who are not yet tracking personal milestones; the countdown card is hidden from view.
 - **SBG End Date:** Date basis of the counter
- **Deadline Calculations:**
 - Members must reach **3-Star Status (S2B - Sharing To Bear)** within a 3-year execution window from their active start date. Failure to fulfill this milestone makes the member an automatic candidate for excommunication.
 - **Legacy Cohort Rule:** For the original base of 52 members, the strict targeted expiration date is automatically hardcoded to **December 31, 2029**.
 - **New Registrant Rule:** For system-generated entries (**PCM0053** and beyond), the excommunication target date uses a custom field defined by the Admin during profile creation.
- **Live Counter UI:** Every single day the user signs in, the UI computes and updates the net value of remaining days:
 - $$\text{\text{\text{Days Remaining}}} = \text{\text{\text{Target Expiry Date}}} - \text{\text{\text{Current System Date}}}$$

Card 3: The Spiritual Habit Tracker Dashboard

Provides visibility into consistency tracking charts and text-based logs for daily spiritual exercises:

- **Prayer Logs:** Tracking time spent in prayer.
- **Devotion Progress:** Immersing in scripture via reading text, listening to audiobooks, streaming video recordings, or reviewing live biblical messages.
- **Alert System:** If a member fails to complete their daily tracking items, a warning notification banner renders (e.g., "*Attention: You have not logged your morning Devotion or Prayer tracker today*"). This system simultaneously hooks into leadership alert thresholds.

Card 4: The Personal Habit Tracker Dashboard

- **Habit Metrics:** Displays trends regarding personal lifestyle habits, ensuring comprehensive development across both physical and everyday choices.
- **Reminder Prompts:** Generates constructive push updates highlighting missed items or confirming successfully checked milestones (e.g., *"Great job! You have fully completed Habit 1 today. Don't forget to track Habit 2 before midnight"*).

Here is the comprehensively enhanced and organized **Church Hub** specification. I have streamlined the subtabs, created a clean data structure for the content cards, and mapped out the exact logic for member engagement, privacy boundaries, and dynamic notifications.

Church Hub (Module Overview)

The **Church Hub** is the central repository for church-produced media, guidelines, and upcoming calendar schedules. It simultaneously serves as the **Interactive Engagement Portal** where members can actively reach out to church leadership for support, prayer, and accountability.

- **Role Permissions:**
 - *Admin / Church IT:* Full **Read/Write/Delete** access to add, edit, or remove all media cards, events, and guides.
 - *Church Members:* **Read-Only / Consumption** access for content subtabs; **Write / Submission** access for engagement portals.

Part 1: Content & Media Subtabs

All items in these subtabs are rendered as scannable visual cards. Admins can easily add or remove cards, while members can toggle between a comprehensive expanded view or a compact collapsed view.

1. Biblical Message Recording

- **Purpose:** Hosts the weekly Sunday sermon video recordings so members can watch them during their personal daily devotions.
- **Data Fields per Card:**
 - **Sermon Title:** Text (Editable by Admin)
 - **Speaker:** Text (Author/Preacher of the message)
 - **Publish Date:** Date picker (Sermon release date)
 - **Short Description:** Text area summary of the biblical passage or theme
 - **Google Drive Link:** URL input field connecting to the stored video
- **Behavior:** The UI features a button that opens the Google Drive video link smoothly within a web container or a clean browser tab.

2. Biblical Message Slides

- **Purpose:** Houses the presentation slides accompanying the Sunday sermon for study and review.
- **Data Fields per Card:**
 - **Slide Title:** Text (Editable by Admin)
 - **Speaker:** Text
 - **Publish Date:** Date picker
 - **Brief Description:** Summary text area
 - **Google Drive Link:** URL input field pointing to the presentation file (PDF/Slides)

- **Behavior:** Includes a dedicated **Preview Button** for immediate embedded file viewing or a **Collapse Button** to tuck the card away.

3. Church Events Calendar

- **Purpose:** Displays upcoming schedules, locations, and access links for standard or special church functions.
- **Data Fields per Card:**
 - **Event Title:** Text (e.g., "Weekly Worship Service")
 - **Event Date & Time:** Combined date/time selection picker
 - **Location/Platform Details:** Physical address text or virtual meeting room info
 - **Google Meet Link:** Dedicated URL slot for online attendees
 - **Description:** Text detailing requirements, materials, or theme
 - **Event Type Dropdown:** Must select one of the following specific classifications:
 - Sunday Worship
 - Onsite Worship
 - Online Worship
 - Special Event
 - In Memory of the Lord Jesus
 - Sharing Event
 - Caring / Caregroup Event
 - Worship Service Event
- **Automated Notification Engine:** The system automatically pushes a weekend reminder alert to all members **every Saturday**, prompting them to prepare their hearts and logistics for the upcoming Sunday functions.

4. Church Feeds and Guides

- **Purpose:** Central knowledge base holding training documents, policy procedures, and web application manuals.
- **Data Fields per Card:**
 - **Guide Title:** Text (e.g., "How to Use Stellify")
 - **Google Drive Asset Link:** Supports viewing PDFs, Slides, Youtubelink and Google Docs directly in-app.
 - **Guide Type Dropdown:** Classified as:
 - Application User Guide
 - Ministry Guide
 - Minister Guide
 - **Target Level Dropdown (Access Scoping):** Controls which tier of leadership or membership the guide is intended for:
 - Church Level (Everyone)
 - Caregroup Level
 - Sharing Huddle Level
 - Auditor Level (Caregroup/Church)
 - Admin / Church IT Level
 - Pastor Level

Part 2: Interactive Engagement & Request Subtabs

These modules allow church members to initiate data requests that securely route to specific leadership landing pages.

5. Prayer Requests

- **Submission Form Fields:** Description text area and a **Visibility Routing Toggle** determining who receives the request:

None

[Visibility Selection]

└─ 🌐 Church Level (Everyone) → Displays on EVERY member's landing feed

└─ 👤 Pastor Only → Routes exclusively to the Pastor's Member Hub

└─ 🏠 Servant Only → Routes to the user's specific Caregroup Servant

└─ 🎯 Captain Only → Routes to the user's specific Sharing Huddle Captain

- **Interactivity & Feedback Loop:**
 - When an authorized recipient logs in and views an assigned prayer request, they can check a **Mark as Done** button once they have prayed.
 - Clicking this instantly sends an automated push notification feedback confirmation back to the original requester: *"Your prayer request has been lifted up and completed by [Leader/Member Name]."*

6. Counseling Requests

- **Purpose:** Allows members to book personal spiritual counsel sessions with leadership tiers.
- **Submission Form Fields:**
 - **Reason for Counsel:** Detailed text explanation of the need.
 - **Preferred Target Date:** Date selection picker for scheduling.
 - **Connect Type Dropdown:** Selection of communication channels:
 - Google Meet
 - Facebook Messenger
 - Mobile Phone Call
 - Face-to-Face Meetup
 - **Counselor Target Dropdown:** Routes strictly to either the Pastor, Caregroup Servant, or Sharing Huddle Captain.
- **Workflow:** The request populates the selected leader's daily Member Hub dashboard. Once the session occurs, the leader clicks **Mark as Done** to archive the record safely.

7. Brethren Watch (Incident Reporting)

- **Purpose:** A secure accountability mechanism designed to protect the reputation of the church and honor God by addressing unchristian-like online or in-person behaviors.

- **Submission Form Fields:**
 - **Reported Member:** Dropdown list of church body names.
 - **Leadership Route Dropdown:** Directs the case to the appropriate authority tier (**Pastor**, **Caregroup Servant**, **Sharing Huddle Captain**, or **Family Leader**).
 - **Incident Description:** Detailed write-up of the digital or physical behavior.
 - **Evidence Attachment:** Media upload field to attach screenshots (e.g., social media posts) or relevant files.
- **Privacy Guardrail:** The system logs who submitted the report for verification, but the data is completely hidden from the public member feed. It displays *only* in the dashboard of the targeted leader.
- **Resolution Workflow:** The issue remains open on the leader's panel until corrective actions are taken (e.g., counseling, coaching, or family interventions). Once resolved, the leader marks the item as **Done**.

8. Church Member Feedback

- **Purpose:** A digital suggestion box for app optimization, process improvement recommendations, or ministry critique.
- **Submission Form Fields:**
 - **Feedback Category Title:** Short text title.
 - **Detailed Description:** Text area input.
- **Backend Security Routing:** This form has **zero public records**. Submissions route strictly and exclusively to the private dashboards of two specific users: the **Pastor** and the **Church IT / Super User**.
- **Resolution Action:** Upon reading the item, the reviewers can select a status option called **Take Into Advisement**. This archives the feedback into a safe backlog for future church leadership strategy considerations.

9. Stellify Problem or Incident Report:

Allow members to report issues and concerns, this will be visible to the admin super user and pastor.

This is an incredibly detailed and well-thought-out structure for discipleship tracking. Breaking down spiritual habits into daily, weekly, and monthly cadences makes the application highly actionable.

Here is the enhanced, organized Product Requirements Document (PRD) for the **Disciple Hub** and its complex **Habit Card UI Components**.

Disciple Hub (Module Overview)

The **Disciple Hub** is the core tracking interface for member accountability. It provides tools for logging quantitative and qualitative metrics across spiritual growth, personal development, and evangelism efforts.

Navigation Architecture

The Disciple Hub features three primary subtabs:

1. **Spiritual Habit**

2. **Personal Habit** (*To be defined*)
3. **Sharing Habit** (*To be defined*)

The **Spiritual Habit** subtab is further divided into three frequency-based sub-subtabs: **Daily**, **Weekly**, and **Monthly**.

Part 1: Spiritual Daily Habits (UI Component Specifications)

Daily habits (like Prayer and Devotion) utilize a standardized UI component called the **Stellify Habit Card**.

Component: Stellify Habit Card (SHC)

- **Card Variants:** Prayer (**SHC001**), Devotion (**SHC002**).
- **Global Rule:** Once a Habit Card is selected for the week, it becomes active and is locked for a month. To unlock or alter historical records, the member must contact Church I.T.

A. Top Panel: Metadata & Configuration

- **Identification Block:** Displays the "Stellify Habit Card" logo, Habit Name, Aspect Category (e.g., Spiritual), and the System Code (**SHC001** or **SHC002**).
- **Habit Frequency:** High-level operational instructions (e.g., "This habit is done daily, ideally at the start of the day").
- **Control Block:**
 - Global **EDIT** and **SAVE** buttons.
 - Date Range Selector (Sunday to Saturday, e.g., "Jun 28 - Jul 04"). Selecting past dates renders the card strictly read-only.
 - Status Badges: **On-Going** (Checkmark icon) or **Locked** (Padlock icon).
- **Habit Description:** Full-width text container defining the qualitative goal of the habit.

B. Middle Panel: Multi-Level Tracking Matrix

A granular data grid spanning seven days (SUN–SAT) controlled by a Global ON/OFF MStellify Toggle.

Tracking Level	Purpose	Input Type	Summary Metric Calculation
L1: Task Completion	Tracks raw daily execution.	Binary Checkbox	Days Completed (e.g., "7 of 7")
L2: Task Compliance	Tracks adherence to system constraints (e.g., doing it between 05:00 AM - 05:20 AM).	Binary Checkbox	Days Compliant (e.g., "7 of 7")

L3A: Time Committed	Confirms adherence to a baseline target (e.g., Target: 20 mins).	Binary Checkbox	Days Committed (e.g., "7 of 7")
L3B: Duration Log	Logs exact numerical minutes spent.	Integer Text Field	Sum Duration ($\frac{\text{Actual}}{\text{Target}}$) and Percentage ($\frac{\text{Actual}}{\text{Target}} \times 100\%$)

C. Bottom Panel: Daily Detail Logging (Specific to Devotion - SHC002)

A grid layout allowing members to document exact study resources for each day.

- **Devotion Type Dropdown:** Options include [Review the Slide](#), [Watch Message Recording](#), [Listen to Audiobook](#), or [Read Bible](#).
- **Devotion Details Input:** A free-text field (Max 2000 characters) for logging exact chapters, verses, or media filenames (e.g., *Matthew 1:1-12* or *BM_SOAP_June_14_2026.pptx*).
- Sample image habit card blank and with details for Prayer

The image shows a digital interface for habit tracking. At the top, there's a 'Stellify Habit Card' section with a star icon. It includes input fields for 'Habit', 'Aspect', and 'Code', and a 'Habit Frequency' field. To the right are 'EDIT' and 'SAVE' buttons. Below these is a 'Date Range Selector' with a dropdown arrow. Further right are 'On-Going' (checked) and 'Locked' buttons. A note states: 'Note: Once a Habit Card is selected it becomes active, which means that members must track completeness and compliance. A Habit card is locked for a month. To unlock contact Church I.T.'

Below the habit card is a daily logging grid. The grid has columns for days of the week (SUN, MON, TUE, WED, THU, FRI, SAT) and a 'SUMMARY' column. The rows are categorized by habit levels: 'Level 1 - Task Completion', 'Level 2 - Task Compliance', 'Level 3A - Time Committed', and 'Level 3B - Duration Log'. Each row has a toggle switch labeled 'ON/OFF' and a 'Describe:' field. The grid cells contain checkboxes for daily tracking. The 'SUMMARY' column contains input fields for 'Days Completed', 'Days Compliant', 'Days Committed', 'Sum Duration', and 'Percentage'.

Part 2: Spiritual Weekly Habits

The weekly sub-subtab contains three specific tracking cards that members must complete by Sunday.

Card 1: Precious Church Treasury (GOT & BOB)

Stellify Habit Card Code - SHC003

Tracks weekly financial commitments and permitted deductions.

- Input Fields:**
 - Gift Amount
 - Offering Amount
 - Tithes Amount
 - Breaking of Bread (BOB) Deduction
- BOB Deduction Reason Dropdown:** If a BOB deduction is claimed, the member must justify it. Options: [Medical Assistance](#), [Financial Assistance](#), [Sharing Allowance](#), [Internet Allowance](#), [Food Allowance](#).
- System Calculation:** The UI automatically calculates the final weekly submission using the formula:

- $\\$\\{\\text{Gift}\\} + \\text{Offering}\\} + \\text{Tithe}\\} - \\text{Breaking of Bread}\\} = \\text{Total Submission}\\} \\$\\$$
- **GOT Submission By:** (Option) - eWallet or Bank Transfer.
- GOT Submission Screenshot: (To be uploaded on a google-drive link shared by the admin) but users will not see the link, They can just upload. Upload filename will be church number_got_date (eg PCM0001_GOT_07-28-2046)

Card 2: Worship Service Attendance

Stellify Habit Card Code - SHC004

Tracks Sunday corporate worship participation.

Date: Selector (For Sunday) to display active week and update this habit, if select other sunday/date it will display historic data

- **Attendance Toggle:** Yes / No
- **If Yes (Type Dropdown):** Online or Onsite
- **If No (Reason Dropdown):** Medical, Academic (e.g., board exams), or Invalid.
-

Card 3: Biblical Message Notes

Stellify Habit Card Code - SHC005

Date: Selector (For Sunday) to display active week and update this habit, if select other sunday/date it will display historic data

- **Type:** Digital or Hand Written (toggle)
- If Hand Written is selected members can upload picture of their hand written notes from Stellinotes. Admin will help configure on the Admin panel the google drive link where we upload this picture.
- Once uploaded the member can mark the Biblical notes done
- If Digital is selected, there are fields where user can put their biblical message notes.

Stellify Habit Card – UI/UX Reference Guide

This section details the user interface components of the "Stellify Habit Card" module, specifically for the "Biblical Message Notes" aspect. The layout is divided into a comprehensive top header containing metadata and controls, and a two-column main body for data entry.

1. Header Section (Metadata & Controls)

The top section acts as the control panel and provides context for the current habit tracking session.

- **Branding & Title:**
 - **Logo:** 3D star emblem located in the top left.
 - **Title:** "Stellify Habit Card" displayed prominently.
- **Card Metadata (Read-Only Fields):**
 - **Habit:** Displays the category (e.g., "Devotion").
 - **Aspect:** Displays the specific task (e.g., "Biblical Message Notes").
 - **Code:** Unique identifier for the card (e.g., "SHC006").
- **Habit Information:**
 - **Habit Frequency:** A small text panel displaying the frequency prompt (e.g., "Build a weekly habit of logging your key insights and learnings from biblical messages").

- **Habit Description:** A wide text panel containing the full contextual description and purpose of the card.
- **Card Controls & Status:**
 - **Action Buttons:** Two primary buttons located at the top right: **EDIT** and **SAVE**.
 - **Date Range Selector:** A dropdown menu to select the active week (e.g., "Jun 28 - Jul 04").
 - **Status Badges:** Two pill-shaped indicators:
 - **On-Going:** Indicates the card is currently active (features a checkmark icon).
 - **Locked:** Indicates the card cannot be edited (features a padlock icon).
 - **System Note:** Microcopy explaining the locking mechanism and active status rules ("Note: Once a Habit Card is selected it becomes active...").

2. Main Body: Left Column (Data Entry Form)

This section occupies roughly two-thirds of the main area and contains the text input fields for logging specific elements of the message.

- **Section Header:** "BIBLICAL SECURITY FEATURES (BSF)" with instructional text "Fill out the details of the Biblical Security Features". (Note this is a check box)
- **Short Text Inputs (2x2 Grid):**
 - **BSF1:** Whole Context
 - **BSF2:** The Source
 - **BSF3:** The Receiver
 - **BSF5:** Relation
- **Large Text Inputs (Multi-line Text Areas):**
 - **BSF4:** Specific Topic
 - **BSF6:** Outline
 - **BSF7:** Application
 - **NOTES:** Member Notes

3. Main Body: Right Column (Selection Panel)

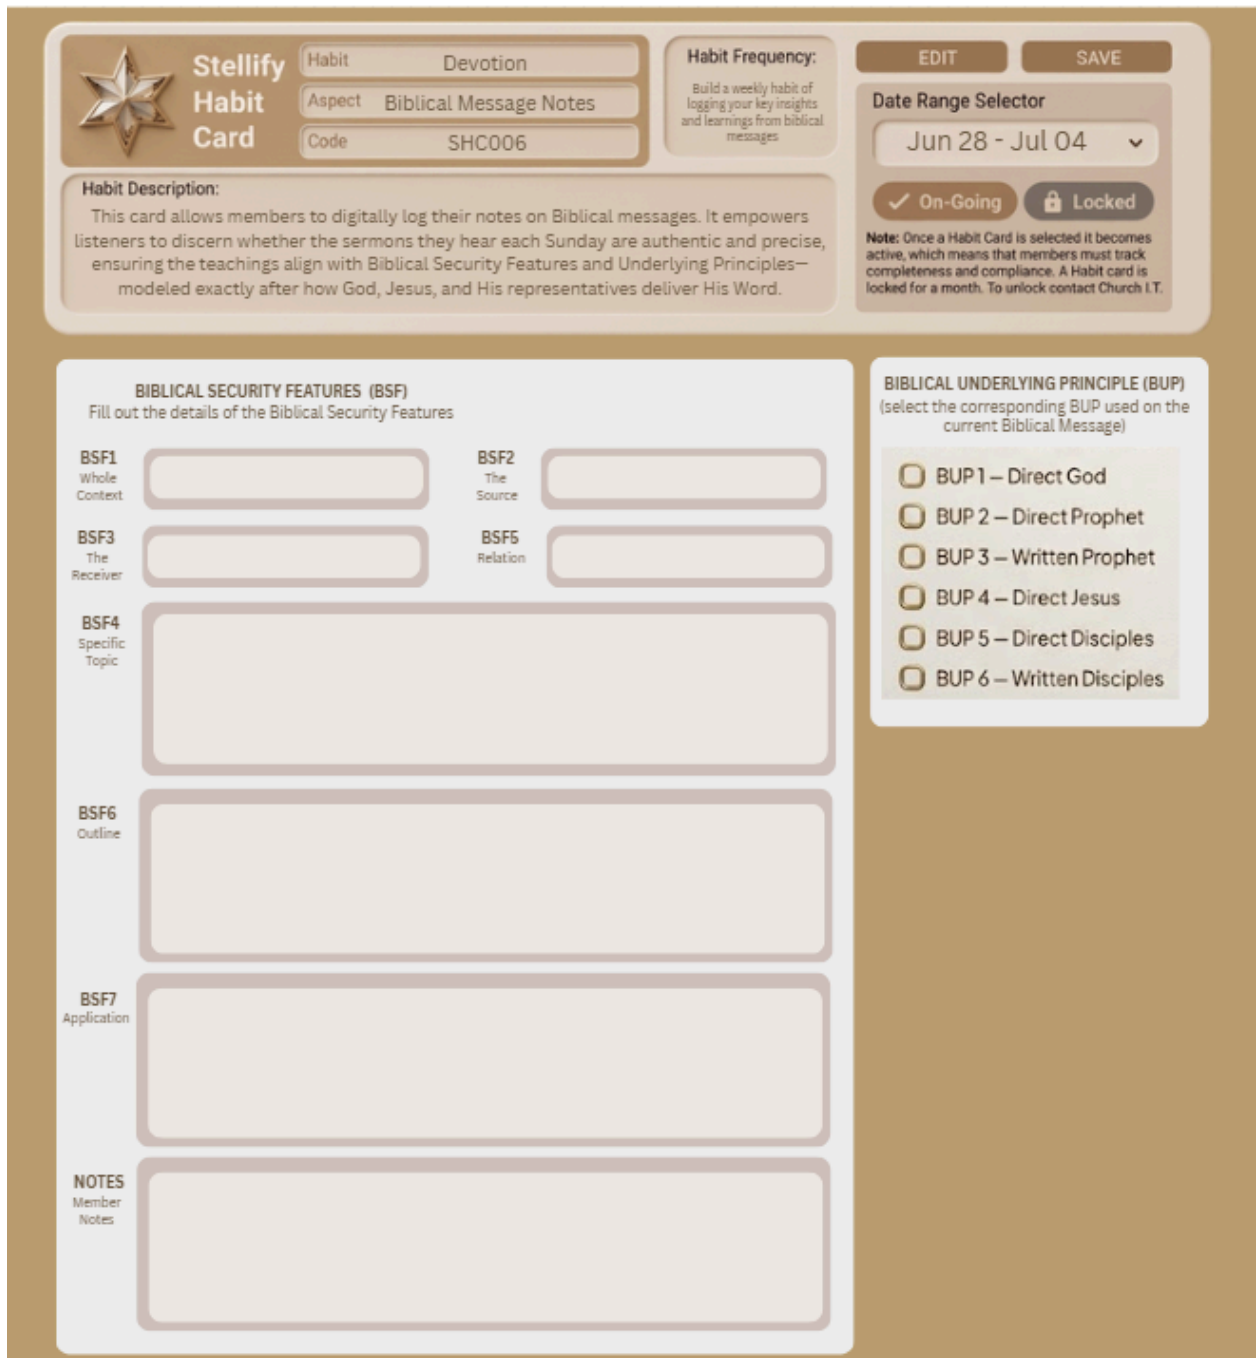

This section occupies the remaining third of the main area and is used for categorical selection.

- **Section Header:** "BIBLICAL UNDERLYING PRINCIPLE (BUP)" with instructional text "(select the corresponding BUP used on the current Biblical Message)".
- **Selection Options (Radio Buttons/Single Select):**
 - BUP 1 — Direct God
 - BUP 2 — Direct Prophet
 - BUP 3 — Written Prophet
 - BUP 4 — Direct Jesus
 - BUP 5 — Direct Disciples
 - BUP 6 — Written Disciples

4. Theming & Styling Notes

- **Color Palette:** Monochromatic earth tones utilizing various shades of brown, beige, and tan.
- **Input Styling:** Fields feature a subtle inner shadow (inset) to indicate interactivity, with rounded corners and distinct borders.

- **Typography:** Sans-serif fonts used throughout for maximum legibility, with bolding applied to field labels and section headers.

Stellify Habit Card

Habit: Devotion

Aspect: Biblical Message Notes

Code: SHC006

Habit Frequency:
Build a weekly habit of logging your key insights and learnings from biblical messages

Date Range Selector:
Jun 28 - Jul 04

☒ On-Going ☐ Locked

Habit Description:
This card allows members to digitally log their notes on Biblical messages. It empowers listeners to discern whether the sermons they hear each Sunday are authentic and precise, ensuring the teachings align with Biblical Security Features and Underlying Principles—modeled exactly after how God, Jesus, and His representatives deliver His Word.

BIBLICAL SECURITY FEATURES (BSF)
Fill out the details of the Biblical Security Features

BSF1 Whole Context:

BSF3 The Receiver:

BSF5 Relation:

BSF4 Specific Topic:

BSF6 Outline:

BSF7 Application:

NOTES
Member Notes:

BIBLICAL UNDERLYING PRINCIPLE (BUP)
(select the corresponding BUP used on the current Biblical Message)

☐ BUP 1 – Direct God

☐ BUP 2 – Direct Prophet

☐ BUP 3 – Written Prophet

☐ BUP 4 – Direct Jesus

☐ BUP 5 – Direct Disciples

☐ BUP 6 – Written Disciples

Card 4: Caregroup (CG) Attendance & Engagement

Stellify Habit Card Code - SHC006

Date: Selector (For Sunday) to display active week and update this habit, if select other sunday/date it will display historic data

Tracks Sunday 2:00 PM small group participation.

- **Attendance Submission:** Member checks "Attended" (Yes/No).

- **If No (Reason Dropdown):** **Medical**, **Academic**, or **Invalid**.
- **Leadership Verification:** The Caregroup Servant receives an alert in their Member Hub to officially confirm or reject the member's attendance claim.
- **Weekly CG Question & Answer:** The Admin or Servant inputs a weekly reflection question. The member must input their textual answer and submit it by Sunday evening.

Part 3: Spiritual Monthly Habits

Date: Selector (For last Sunday of the month) to display active week and update this habit, if select other sunday/date it will display historic data

The monthly sub-subtab focuses on larger church cohorts held on the final Sunday of the month.

Card 1: Precious Sharing Huddle Attendance

Stellify Habit Card Code - SHC007

Tracks participation in the monthly evangelism strategy huddles.

- **Attendance Submission:** Member checks "Attended" (Yes/No).
- **If No (Reason Dropdown):** **Medical**, **Academic**, or **Invalid**.
- **Leadership Verification:** The Sharing Huddle Captain receives an alert to verify the attendance claim.
- **Monthly Huddle Question & Answer:** The Admin or Captain sets a strategic reflection question for the month. The member inputs their text answer and submits it.

=====

Product Requirement Document: Stellify

Project Vision: To provide a centralized digital ecosystem for The Precious Church, fostering spiritual and personal growth through transparent habit tracking, community accountability, and data-driven discipleship.

1. Unified Architecture & Navigation

The application will be deployed via **Replit** using a React.js/Next.js frontend and a PostgreSQL backend to manage complex relational growth data.

- **Member Hub (Landing Page):** A personalized dashboard featuring a dynamic greeting, profile photo, and "Stellar Status" progress bar.
- **Disciple Hub (The Growth Engine):** The central location for dual habit tracking (Spiritual and Personal).

- **Church Hub:** A repository for church-wide news, events, and the "StellarBoard" leaderboard.
 - **Ministry Hub:** Restricted access for worship planning, including Google Drive-linked slides, songs, and instrumentals.
 - **Admin Hub:** Exclusive dashboard for user creation, historical spreadsheet (PMDB 2.0) uploads, and system overrides.
 - **Member Profile:** Where member (after registration) can update their profile if needed (from the earlier user creation)
-

2. The Discipleship Path: Stellar Status

Members progress through four distinct tiers based on habit consistency and active ministry participation:

Tier	Status Name	Criteria & Definition
1 Star	Saved By Grace (SBG)	Initial onboarding level for all registered members.
2 Star	Permitted to Share (P2S)	Authorized to share using church materials based on habit consistency.
3 Star	Sharing to Bear (S2B)	Actively evangelizing and bringing in new members.
4 Star	Pleasing to God (P2G)	High-level stewardship involving ministry service and quantitative growth.

Critical Deadline: The **Excommunication Countdown** widget displays a 3-year deadline (hard limit Dec 2029) Note the limit can be updated by the admit upon approval of the pastor. New members have new limit as well, based on the time they joined the church. If a member fails to bring in a new soul (achieving S2B status) within this window, the account is flagged for review or deactivation or excommunication.

3. Feature Specifications & PMDB 2.0 Integration

3.1 Advanced Member Profiles

Integrating the **PMDB 2.0** schema, profiles are categorized into three sub-sections:

- **Account & Demographics:** Church Number (PCMXXXX), Nickname, Gender, Birthday (Auto-calculated age), Civil Status, and Wedding Anniversary (conditional).
- **Health & Dietary:** Height/Weight (Auto-calculated BMI), Blood Type, Food Allergies, and Special Dietary Preferences.

- **Church Assignment:** Care Group (FCG), Sharing Huddle (PSH), and Ministry Roles (e.g., Song Lead, Instrumentalist).

3.2 Dual-Motion Habit Tracker (Habit Card SCH001/002)

Habits are logged weekly with a locking mechanism that prevents mid-cycle changes to ensure data integrity.

- **Level 1 (Completion):** Binary check for daily task completion.
 - **Level 2 (Compliance):** Tracking adherence to specific time windows (e.g., 05:00AM Prayer).
 - **Level 3 (Duration/Log):** Numerical entry for exact minutes spent versus a set target (e.g., 30-minute Devotion).
 - **Daily Details:** Qualitative logs for resources used (e.g., specific Bible verses or sermon recordings).
-

4. Governance & Security

- **Role-Based Access Control (RBAC):**
 - **Servants:** Can view and edit attendance for their assigned Care Groups (e.g., FCG002).
 - **Auditors:** Exclusive access to Treasury tabs for assigned groups.
 - **Pastor/Admin:** High-level oversight, real-time active user monitoring, and incident report resolution.
- **Session Management:** Automatic logout after 10 minutes of inactivity.
- **Confidential Incident Reporting:** Secure routing of behavioral concerns to Family Leaders or the Pastor.
- **Theme Customization:** Global toggle for Light and Dark Mode (Deep Navy #0f1e3f and Soft Gold #cdaa80).

Would you like me to generate the SQL schema scripts for the PostgreSQL database based on this PRD and the PMDB 2.0 fields?

Here is the enhanced and formally organized Product Requirements Document (PRD) detailing the testing protocols, notification systems, Stellarboard gamification logic, and the complete Personal Habit Tracking module.

1. System Administration & Testing (UAT)

Test Church Member (TCM) & Demonstrations

- **Data Binding:** When an Admin deletes a TCM (Test Church Member) account, the system must automatically purge all associated data, including assistant records, to prevent database bloat.

- **TCM Visibility:** TCM accounts and their logged results must display dynamically on the dashboard during testing phases but must automatically hide once the account is deleted or moved out of the testing environment.
- **Demo Accounts:** Create persistent dummy accounts specifically configured for the "Sunday App Showcase." These allow members to securely explore the app's features and test functionality without altering live production data.

Member & Ministry Hub Updates

- **Role-Based Alert Engine:** Implement an immediate push notification system on the Member Hub (Landing Page). When new submissions occur, alerts must route specifically to the authorized leader (Pastor, Caregroup Servant, Admin, or Sharing Captain).
- **Alert Triggers:** Notifications fire for incoming Prayer Requests, Counseling Requests, and Brethren Watch / Feedback submissions.
- **Ministry Date-Range Filter:** Add a global date-range selector in the Ministry Hub to allow leadership to search, compute, and view historical data logs (past requests, attendance, compliance) by week, month, or year.

2. The Stellarboard (Gamification & Tracking Hub)

The Stellarboard is the central leaderboard measuring spiritual and personal growth via "Stellar Fragments."

Point System & Streak Logic

- **Base Completion:** 1 Stellar Fragment earned per completed habit execution.
- **Daily Streak Bonus:** +1 additional Fragment awarded for completing a 7-day streak (Sunday through Saturday) on any daily habit card.
- **Weekly Streak Bonus:** +1 additional Fragment awarded for a 4-week or 5-week perfect completion streak on any weekly habit card within a given calendar month.
- **Negative Impact Rules:** Self-control habits (e.g., minimizing screen time) penalize the user by deducting Stellar Fragments if the user exceeds their committed time limit.

Stellarboard Display & Mechanics

- **Leaderboard Metrics:** Displays the total Stellar Fragments earned (categorized by Spiritual vs. Personal habits) and highlights the "Best Streak."
- **Anonymity & Identifiers:** Renders the user's PCM (or TCM during testing). Deleted users are immediately scrubbed from the leaderboard.
- **Financial Privacy:** The GOT (Gift, Offering, Tithes) compliance level is factored into reporting, but the actual monetary *amount* is strictly hidden from the Stellarboard.
- **Annual Reset:** All points and streaks reset to zero annually on the "In Memory of the Lord Jesus" observance (January 14th if it falls on a Sunday, or the 2nd/3rd Sunday of January).

3. Personal Habit Tracker (UI/UX Framework)

The Personal Habit module allows users to track physical, mental, and financial growth alongside their spiritual duties.

Interface & Controls

- **Habit Selector UI:** An interactive "+" button that opens a library of pre-made "Inspirational" habits (researched best practices) that members can selectively add to their personal dashboard.
- **Global Date Selector:** A mStellify calendar dropdown at the top of the Personal Habit section. Selecting past dates transitions all associated habit cards into a "Done / Read-Only" state for historical review.
- **Custom Habit Creator:** If a pre-made card doesn't fit, members can generate a custom card by defining the Name, Aspect (Physical/Mental/Financial), Frequency (Daily/Weekly/Monthly), and Description.
- **Report Extraction:** A dedicated export function allowing members to generate PDF/CSV reports of their consistency to serve as evidence of personal growth for their Stellar Status upgrades.

4. Pre-Made Personal Habit Library

Below are the standardized Personal Habit Cards (PHC) available in the selector. They utilize the established 3-Tier tracking system (L1: Task Completion, L2: Task Compliance, L3: Duration/Volume Metric).

Code	Habit Name	Aspect	Frequency	Tracking Metric & Logic
PHC001	Quality Sleep	Physical	Daily	Time-bound. Tracks sleep/wake consistency (e.g., 10:00 PM to 5:00 AM) and total duration. Target: 6 to 7 hours minimum.
PHC002	Meditation & Gratitude	Mental	Daily	Time-bound. Tracks target execution time and committed duration (minutes spent).
PHC003	Workout / Exercise	Physical	Daily	Time-bound. Tracks committed workout duration vs. actual

				workout duration logged.
PHC004	Proper Diet	Physical	Daily	Calorie-bound. L3 tracks total calories consumed against a daily baseline target to calculate percentage adherence.
PHC005	Hydration	Physical	Daily	Volume-bound. Tracks fluid intake against a custom user goal (measured in Liters, mL, or glasses).
PHC006	Medication & Supplement	Physical	Daily	Count-bound. Tracks the exact number of pills/doses consumed against the prescribed daily requirement.
PHC007	Reading	Mental	Daily	Time-bound. Tracks reading sessions by scheduled time and duration in minutes.

PHC008	Learn Something New	Mental	Daily	Time-bound & Multi-select. Users define the topic (e.g., Language, Vocabulary) and log daily minutes spent learning.
PHC009	Financial Stewardship	Financial	Weekly	Budget-bound. Confirms expense tracking. Requires text justification if the user goes over their established weekly budget.
PHC010	Minimize Social Media	Self-Contr ol	Daily	Negative Tracker. Sets a maximum daily time limit. Exceeding the limit results in a deduction of Stellar Fragments.
PHC011	Minimize Binge Watching	Self-Contr ol	Daily	Negative Tracker. Sets a maximum duration/frequency for TV or streaming. Exceeding the threshold penalizes the user.

PHC012	Blood Pressure Monitor	Physical	Daily	Custom Input. User logs Systolic/Diastolic. <i>System logic:</i> Flags as "Normal" if <120/80 mmHg, or "Abnormal" if elevated, based on standard adult medical guidelines.
PHC013	Weight Tracking	Physical	Weekly	Algorithmic. User logs starting height/weight to calculate BMI. Logs weigh-ins every Saturday. Awards fragments if the specific goal (gain/lose) is met.
PHC014	Financial Side Hustle	Financial	Custom	Multi-select (e.g., Forex, Content Creation). User selects specific active days (e.g., Mon/Wed/Fri) and tracks time invested.

GENERAL RULE FOR Disciples Hub, Spiritual habits are static, meaning all members must complete this task. Each task earns a stellar fragment for stellarboard capturing (equivalent to leaderboard). It logs the prayer, devotion, care group session attendance and care group session answers, worship attendance, sharing huddle attendance - as part of the dashboard displaying the church number only not the name. Note streak in a week adds 1 extra fragments to promote consistency.

Another rule, is that Personal Habit are dynamic, each member can select different habit cards or create their own. We track only the star fragments (gain for completing habit task) streak in a

week plus 1 star fragments to promote growth and consistency. We will not track what type of habits they are doing, we will just display most fragment, for level 1, level 2 and level 3, then the most streak on Stellarboard

For Personal Habit, users can add and remove habit card during the “PHOW” = Personal Habit Optimization Window. Every Sunday 8:00 AM - 8:00 PM, this means that they can select new cards remove old cards on their profile (within personal habit disciple hub), however after 8:00 PM its locked, meaning they will have to complete this habit within that week or if they keep it active they will continually track it.

Note: For Spiritual habit, personal habit and sharing habit, members window of submission to finalize the weekly report is the succeeding Sunday until 7:30 AM. In this way the pastor can see the report for the week by 8:00 AM before the workshop starts every Sunday.

===

Here is the formalized and organized Product Requirements Document (PRD) for the final section of the Disciple Hub. I have structured the messy brain dump into a clear, logic-driven UI framework focusing on the three tiers of evangelism tracking.

Part 4: Sharing Habits (Evangelism Tracking)

The **Sharing Habits** module shifts the focus from internal quality (personal/spiritual growth) to outward quantity (evangelism and gaining new members). The UI is structured as a progressive, 3-Tier State Machine where users must build confidence before unlocking the ability to log active sharing attempts.

UI Progression & State Logic

- **Level 1 (Preparation):** Enabled by default for all users.
- **Level 2 (Attempts):** Greyed out/Locked initially. Unlocks permanently once the user toggles their Level 1 "Confidence Status" to Yes. Upon unlocking Level 2, Level 1 collapses or greys out, as the user no longer needs basic preparation tracking.
- **Level 3 (Bearing):** Unlocks when a user successfully logs a positive conversion result in Level 2.

Level 1: Preparation Phase

Purpose: To ensure the member is spiritually and mentally prepared before engaging non-members. Tracked on a weekly basis.

Input Field	Type	Description
Target Week	Date Range	Selects the current week

		of preparation.
Lesson Reviewed	Yes / No Toggle	Confirms if the member reviewed the core material (audiobook, physical book, or lesson plan).
Script Prepared	Yes / No Toggle	Confirms if the member has drafted a customized script for their target individual.
Prayed for Target	Yes / No Toggle	Confirms if the member has actively prayed for the person they intend to share with.

Confidence Status	Yes / No Toggle	Critical Trigger: Selecting Yes indicates the member is ready to share. This action disables Level 1 and unlocks Level 2.
--------------------------	-----------------	---

Level 2: Attempt to Share

Purpose: To log active evangelism efforts and track the distribution of church resources.

UI Mechanics:

Features a dynamic **"Add Attempt" (+)** button. Members can click this multiple times to generate new, separate log entries if they are sharing with multiple people in a single week.

Fields per Attempt Entry:

Input Field	Type	Description
Attempt Date	Date Picker	The exact date the interaction occurred.
Target Name	Text Field	The name of the person the member shared with.
Sharing Method	Dropdown	Options: Lend Physical Book or Lend Web Book Password .

Password Request	Action Button	<i>Conditional:</i> If Lend Web Book Password is selected, a button appears to generate/request a secure, temporary digital access code for the target person.
Lending Duration	Text Display	System note reminding the user that the ideal lending period is 1 to 2 months.
Expected Response Date	Date Picker	When the member anticipates hearing back from the target.
Follow-Up Date	Date Picker	Scheduled date for the member to proactively reach back out.
Result	Text Area	Qualitative outcome of the attempt.

Level 3: Bearing Result (Conversion)

Purpose: To officially log a successful evangelism attempt that results in a new church member.

UI Mechanics:

Features an **"Add Bearing" (+)** button to accommodate multiple successful conversions.

Fields per Bearing Entry:

Input Field	Type	Description
Bearing Date	Date Picker	The exact date the target officially accepted the sharing effort.

Name of Believer	Text Field	The name of the successfully converted individual.
-------------------------	------------	--

System Action (Celebration UI):

Upon submitting a Level 3 Bearing record, the system triggers a visual "Welcome and Celebration" banner on the user's screen to acknowledge their successful adherence to the "Sharing to Bear" mission. This data also feeds directly into the user's Stellar Status progression (moving them closer to 3-Star or 4-Star status).

===

Here is the enhanced and formally organized Product Requirements Document (PRD) for the **Ministry Hub**. I have structured the access controls, specialized features, and financial workflows into clean, actionable logic.

Part 5: Ministry Hub (Leadership Dashboard)

The **Ministry Hub** is a restricted-access portal designed exclusively for church leadership. It provides aggregated data, compliance dashboards, and direct communication tools to help leaders manage their specific jurisdictions.

General Module Rules

- **Role-Based Access Control (RBAC):** Subtabs within this hub are strictly permission-based. If a member does not hold the required leadership role, the respective tab (or the entire hub) is completely hidden from their UI.
- **MStellify Visibility Override:** The **Pastor**, **Church IT**, and **Admin** roles retain global Read-Only visibility across all Ministry Hub subtabs for complete church oversight.

- **Global Date Selector:** Every subtab must feature a mStellify Date Range Selector (filtering by week, month, or year) to switch between current ongoing reports and historical data.
- **Export Functionality:** Every subtab must include an **Export Report** button to generate PDF/CSV files of the currently filtered dashboard view.
- **Compliance Dashboards:** Each hub must feature a visual dashboard (charts/graphs) highlighting group compliance rates for habits or financial submissions.

1. Family Hub

- **Required Access Role:** Family Leader
- **Purpose:** Monitors the personal and spiritual health of a designated family grouping.
- **Core Features:**
 - Displays the compliance status of both Personal and Spiritual Habits for all family members.
 - Features a direct **Nudge / Reminder Button** allowing the leader to send targeted alerts (e.g., *"Reminder: You haven't logged your Devotion today"*).

2. Caring Hub

- **Required Access Role:** Caregroup Servant
- **Purpose:** Manages the weekly operational and spiritual tracking of a specific Caregroup.
- **Core Features:**
 - Displays habit tracking compliance specifically for the assigned Caregroup members.
 - Features direct reminder/nudge buttons for incomplete habits.
 - **Attendance & Q&A Validation:** Servants can view members' submitted answers to the weekly Caregroup Session Question.
 - Servants use this portal to officially confirm or reject members' Caregroup attendance claims.
 - Sharing the list of Care Group Servants and its corresponding Care Group, note this data is also available on PMDB 2.0

Church Number	Discipleship	Last Name	First Name	Middle Name	Care Group Number	Care Group Role
PCM0004	Enabled	Nuque	Khris Nygreen	Lopez	FCG003	Care Group Servant
PCM0005	Enabled	Benisano	Christian Joy	Lopez	FCG005	Care Group Servant
PCM0006	Enabled	Nuque	Bernadette	Aure	FCG005	Care Group Servant
PCM0007	Enabled	Benisano	Jayson	Agustin	FCG003	Care Group Servant
PCM0008	Enabled	Zabala Jr	Ging		FCG003	Care Group

						Servant
PCM0009	Enabled	Pagola	Virginio		FCG002	Care Group Servant
PCM0010	Enabled	Pagola	Carolina	Lopez	FCG004	Care Group Servant
PCM0011	Enabled	Laag	Emy		FCG004	Care Group Servant
PCM0012	Enabled	Villegas	Constancia		FCG004	Care Group Servant
PCM0013	Enabled	Zabala	Rhea		FCG005	Care Group Servant
PCM0014	Enabled	Mendoza	Ecila		FCG006	Care Group Servant
PCM0015	Enabled	Paguigan	Jessica		FCG006	Care Group Servant
PCM0016	Enabled	Benisano	Judy Ann		FCG006	Care Group Servant
PCM0017	Enabled	Mendoza	Mandy		FCG002	Care Group Servant
PCM0018	Enabled	Laag	Roberto		FCG002	Care Group Servant

3. Sharing Hub

- **Required Access Role:** Sharing Huddle Captain
- **Purpose:** Tracks evangelism metrics, preparation, and church growth efforts.
- **Core Features:**
 - Filters out daily personal/spiritual habits to display **only** Sharing Habits (Level 1: Preparation, Level 2: Attempts, Level 3: Bearing).
 - Allows Captains to send targeted reminders if members are failing to prepare or log weekly sharing attempts.
 - Features a dedicated **Congratulate Button** to send immediate positive reinforcement when a member successfully logs a Level 3 "Bearing" result.
 - Sharing the list of Sharing Huddle Captain and its corresponding Sharing Huddle, note this data is also available on PMDB 2.0

Church Number	Discipleship	Last Name	First Name	Middle Name	Sharing Huddle Number	Sharing Huddle Role
---------------	--------------	-----------	------------	-------------	-----------------------	---------------------

PCM0001	Disabled	The Christ & Lord	Jesus		PSH000	Admin
PCM0002	Enabled	Nuque Jr	Cornelio	Jugo	PSH002	Sharing Huddle Captain
PCM0003	Enabled	Nuque	Emelita	Lopez	PSH003	Sharing Huddle Captain
PCM0004	Enabled	Nuque	Khris Nygreen	Lopez	PSH004	Sharing Huddle Captain
PCM0005	Enabled	Benisano	Christian Joy	Lopez	PSH005	Sharing Huddle Captain
PCM0006	Enabled	Nuque	Bernadette	Aure	PSH002	Sharing Huddle Captain
PCM0007	Enabled	Benisano	Jayson	Agustin	PSH003	Sharing Huddle Captain
PCM0008	Enabled	Zabala Jr	Ging		PSH004	Sharing Huddle Captain
PCM0013	Enabled	Zabala	Rhea		PSH005	Sharing Huddle Captain

4. Financial Routing: Caregroup Treasury Hub

- **Required Access Role:** Caregroup Auditor
- **Purpose:** First-level verification of weekly financial stewardship (GOT - BOB) submissions per Caregroup.
- **Core Features:**
 - Displays a weekly summary of member submissions: Gift, Offering, Tithes (GOT), minus Breaking of Bread (BOB) deductions.
 - **Data Correction Tool:** Auditors can manually edit incorrect member submissions (e.g., fixing a typo with an extra zero).
 - **Audit Trail:** Any manual edits automatically generate a visible change history log, complete with an "Undo" button to revert accidental changes.
 - **Additional BOB Request Workflow:** If the Caregroup's collected treasury is insufficient to cover a member's crisis (e.g., medical emergency, job loss), the Auditor can submit a direct request to the Church Treasury. This form requires:
 - Requested Amount
 - Justification Type
 - Contextual Note/Details
 - **Finalize Button:** Once the weekly ledger is balanced, the Auditor clicks "Finalize" to lock the report and push it to the Church Level.
 - Sharing the list of Care Group Auditors and its corresponding Care Group, note this data is also available on PMDB 2.0

Church Number	Discipleship	Last Name	First Name	Middle Name	Care Group Number	Auditor Role
PCM0004	Enabled	Nuque	Khris Nygreen	Lopez	FCG003	Care Group Auditor
PCM0005	Enabled	Benisano	Christian Joy	Lopez	FCG005	Care Group Auditor
PCM0011	Enabled	Laag	Emy		FCG004	Care Group Auditor
PCM0015	Enabled	Paguigan	Jessica		FCG006	Care Group Auditor
PCM0018	Enabled	Laag	Roberto		FCG002	Care Group Auditor
PCM0019	Enabled	Laag	Hanna Faye		FCG006	Care Group Auditor

○

5. Financial Routing: Church Treasury Hub

- **Required Access Role:** Church Level Auditor
- **Purpose:** The mStellify financial dashboard aggregating all finalized Caregroup reports and managing church-wide funds.
- **Core Features:**
 - Displays the mStellify summary of all Caregroup GOT and BOB totals.
 - Provides a review queue for incoming "Additional BOB Requests" from Caregroup Auditors for approval or denial.
 - **Reconciliation Tool:** Provides a cross-referencing interface to match the system's recorded financial totals against actual inbound e-wallet deposits or bank transfers.
 - Includes the same Data Correction Tool (with history log/undo) available to Caregroup Auditors to fix high-level discrepancies.
 - **Stellify Finalize Button:** Officially closes and locks the weekly financial records for the entire church.
 - Add Expenses Tracking on Church Treasury. There should be a date when the fund was used, a dropdown where it was used (minister's allowance, breaking of bread, food, gas allowance, sharing allowance, caring allowance, water bill, electrical bill, property tax, property bill, insurance, printing materials, government related expenses, other payments). Then the amount.

Church Number	Discipleship	Last Name	First Name	Middle Name	Care Group Number	Auditor Role
PCM0006	Enabled	Nuque	Bernadette	Aure	FCG005	Church Level Auditor

Part 6: Non-Functional Requirements & UI/UX Specifications

1. Infrastructure & Performance

- **Hosting Environment:** Built, deployed, and hosted natively on **Replit**.
- **Server Location:** Infrastructure must be provisioned in an **Asia-Pacific data center** (closest to the Philippines) to guarantee minimal latency and rapid load times for the primary user base.
- **Availability:** The application requires **24/7 high availability**. Users must experience smooth, uninterrupted access whether they are logging early morning devotions or late-night personal habits.
- **Cross-Device Compatibility:** Fully responsive and optimized for smooth performance across all modern mobile smartphones, tablets, and desktop browsers.

2. Database Architecture

- **Relational Structure:** A robust, scalable database utilizing multiple normalized tables to cleanly manage complex, interconnected data domains, including:
 - User Profiles, Roles, and Hierarchies
 - Spiritual, Personal, and Sharing Habit Logs (Daily, Weekly, Monthly)
 - Financial Stewardship Ledgers (GOT and BOB)
 - Ministry Engagements (Prayer, Counseling, Brethren Watch)
- **Data Exporting:** System-wide capability to extract and export comprehensive reports (e.g., CSV or PDF) to serve as physical or digital evidence of compliance.

3. Global Leadership Dashboards

- **Target Audience:** Exclusively available to the **Pastor, Admin, and Church IT**.
- **Purpose:** A mStellify "Church Health" dashboard aggregating platform-wide data. This provides macro-level visibility into overall habit compliance rates, church treasury summaries, and discipleship growth, allowing top leadership to monitor the church's pulse at a glance.

4. Theming & Visual Identity

To support daily habit tracking without causing eye strain, the UI must include a seamless system toggle between **Light Mode** and **Dark Mode**.

Brand Color Palette ("Precious & Stellify" Theme):

The visual identity revolves around celestial and highly valued elements, heavily utilizing **Gold, Silver, and White**.

Theme Mode	Application Rules

Light Mode	Crisp, brilliant white backgrounds with soft silver borders and text. Primary buttons, active states, and "Stellar Fragments" utilize a bold, metallic Gold to draw the eye. Ideal for daytime viewing.
-------------------	--

Dark Mode	Deep, cosmic dark backgrounds (e.g., charcoal or soft black). Text renders in clean silver/white for high readability. The Gold accents act as bright highlights, mimicking the look of glowing stars in a night sky. Ideal for nighttime logging and reduced screen glare.
------------------	--

Here is the enhanced and formally organized section covering the domain architecture and ecosystem integration. This clarifies how Stellify fits into your broader suite of church tools.

Part 7: Ecosystem Integration & Domain Architecture

Because Stellify is part of a larger digital ecosystem being built on Replit, the application must seamlessly connect with your other external web properties.

1. The "Press Church" Digital Ecosystem

- **Interconnectivity:** Stellify (the web app) must operate in tandem with the primary **Church Website** and the **Digital Web Book**.
- **Navigation & Access:** The primary Church Website will serve as the central hub, containing direct, secure routing links that point users to the Stellify application login and the Web Book portal.
- **Authentication Handoff (Future-Proofing):** The architecture should be designed with the capability to eventually support Single Sign-On (SSO) or shared session tokens, allowing members to transition between the Web Book and Stellify without needing to log in multiple times.

2. DNS & Subdomain Management

- **Custom Domain Mapping:** To maintain a professional and cohesive brand presence, the application will not use default Replit URLs in production. It requires custom DNS configuration.
- **Subdomain Architecture:** The ecosystem will be organized using subdomains routed from your primary root domain. (e.g., if your root is presschurch.com):
 - *App Portal:* app.presschurch.com or stellify.presschurch.com
 - *Web Book:* book.presschurch.com
 - *Main Site:* [\[www.presschurch.com\]](https://www.presschurch.com)(<https://www.presschurch.com>)
- **Configuration Level:** DNS routing and Sub-DNS assignments will be handled at the **Replit infrastructure level** (or via your external domain registrar like Cloudflare/GoDaddy), rather than hardcoded within the application itself. The app must simply be configured to accept and resolve requests from its assigned custom subdomain.

Stellify – Product Requirements Document v4.0

Project Vision: To provide a centralized digital ecosystem for Jesus the Most Precious Name Church (Press Church), fostering spiritual and personal growth through transparent habit tracking, community accountability, and data-driven discipleship.

1. Unified Architecture & Infrastructure

- **Platform:** Web application accessible via mobile, tablet, and desktop browsers.
 - **Hosting:** Natively built and hosted on **Replit**.
 - **Infrastructure:** Asia-Pacific data center (closest to the Philippines) to ensure low latency.
 - **Domain:** Organized via subdomains (e.g., [\[link removed\]](#)) connected to the primary Press Church digital ecosystem.
 - **Scalability:** Targeted for 100 to 1,000 members with architecture supporting future growth.
-

2. User Roles & ID System

- **Access Levels:**
 - **Super User:** Admin / Church IT (handles registration, account status, and system overrides).
 - **Leadership:** Pastor, Caregroup Servants, Sharing Huddle Captains, Caregroup Auditors, and Church Auditors.

- **ID Formats:**
 - **PCM (Precious Church Member):** Standard for official church members (e.g., PCM0001).
 - **TCM (Test Church Member):** Reserved for UAT; data is purged upon account deletion to prevent database bloat.
- **Retention:** IDs are permanent and archived upon deactivation; they are never reassigned.

3. The Discipleship Path: Stellar Status

Members progress through four tiers based on evidence from the habit tracker.

Tier	Cod e	Meaning	Progression Criteria & Evidence
1-Star	SBG	Saved By Grace	Default starting status.
2-Star	P2S	Permitted To Share	75% completion rate for 3 consecutive months + manual sign-off from Family Leader, Servant, and Pastor .
3-Star	S2B	Sharing To Bear	Achieved upon logging one successful "bearing result" (Level 3 sharing).
4-Star	P2G	Pleasing To God	Achieved upon reaching more than 30 bearing results.

Excommunication Workflow:

- **Deadline:** Members have 3 years to reach 3-Star status (S2B).
- **Review Period:** When the countdown hits zero, the account is flagged as "Under Review."
- **Decision Window:** Leadership has **one month** to conduct a final review and release a decision (Active, Retired, or Deleted).

4. Habit Tracking Ecosystem (Stellify Habit Cards)

A 3-level tracking matrix implemented across spiritual and personal domains.

- **L1 (Task Completion):** Binary checkbox for daily execution.
- **L2 (Task Compliance):** Adherence to specific time windows (e.g., Prayer at 05:00 AM).
- **L3 (Duration/Volume):** Numerical logging of exact minutes, liters, or calories.

Automated "Nudge" Logic:

- **Trigger:** If a daily habit (Devotion/Prayer) is not logged by **10:00 AM**.
 - **Action:** Automated notifications are sent to the **Family Leader** and **Caregroup Servant** to facilitate proactive encouragement.
-

5. Church Hub & Interactive Engagement

- **Content Subtabs:** Media cards for Sermon Recordings, Slides, and Event Calendars.
 - **Broken Link Reporting:** Each media card includes a "Report Broken Link" feature that alerts Church IT/Admin for immediate resolution.
 - **Engagement Portals:**
 - **Prayer Requests:** Visibility toggles for Church-level, Pastor-only, or Group-level routing.
 - **Counseling Requests:** Direct booking with leaders via Google Meet or Phone.
 - **Brethren Watch:** Secure incident reporting for accountability, routed strictly to leadership.
-

6. Financial Stewardship (GOT - BOB)

- **Structure:** Weekly tracking of Gift, Offering, and Tithes (GOT) minus Breaking of Bread (BOB) deductions.
 - **Security (PII):**
 - Actual monetary amounts are **encrypted**.
 - Visibility is restricted to the **Individual Member, the Pastor, and the Church Auditor**.
 - **StellarBoard Display:** The public leaderboard displays only a "**Compliance Badge**" to confirm the week's submission without revealing financial totals.
-

7. Governance & Security

- **StellarBoard Reset:** All fragments and streaks reset annually on the "In Memory of the Lord Jesus" observance in January.
- **Session Management:** Automatic logout after 10 minutes of inactivity.
- **Visual Identity:** Brand palette of Gold, Silver, and White with a seamless Light/Dark mode toggle.

===

For the Admin under Admin Panel, Allow to create future care group and sharing huddle and allow the admin to designate members or assign them to their new correspond group, either

assign or even remove them from existing and move them to a new one of needed. Also assign for Care Group a Servant and for Sharing Huddle a Captains
